WORK EXPERIENCE

Frontend Software Engineer, Axur - *May/2021 - present*

Axur provides a suite of solutions for cybersecurity, it is one of the most relevant companies in this sector in Latin America.

⇢ Developed & maintained solutions with ReactJs using a micro frontend system with continuous integration and clean code.

⇢ Created components with Styled Components from Figma to design systems by Storybook, taking care with accessibility, UX, fidelity with prototypes and documentations.

⇢ Designed components architectures keeping responsibility for layers and patterns to help a easy scale.

⇢ Built integrations with REST apis to provide value and understand problems and needs for the company and our clients.

Mobile Software Engineer, Ioasys - *December/2020 - May/2021*

Ioasys is a bigger software house on Brazil that built solutions to clients with different expertise

⇢ Built a mobile app with ReactNative consuming a REST api and design components from Figma.

⇢ Design mobile architecture to provide a good solution between client and technology specs.

⇢ **Director of Software Development, Growbit** - *June/2019 - December/2020*
